

If you are unable to see the photos or the “Zoom Tool” while adding your images in MLXchange, the following should help:

1. Make sure you log out of MLXchange before changing your settings.
2. Go to Tools/Internet Options/Security Tab
3. Click on the Green Check Mark “Trusted Sites”
4. Click on the **Sites** button

5. Remove the checkmark next to the “requires server verification (https) for all sites...”
6. Add the following website to the zone: <http://rmlsfl.MLXchange.com>
7. Click the **Add** button, and then click **Close**
